OLGA

B.Tech • Computer Science & Engineering (AI & ML) • First-Year Student

PROFILE

First-year B.Tech student in Computer Science & Engineering (AI & ML), building practical projects across software development, web technologies and connected devices. Interested in programming, cybersecurity, AI/ML and learning through hands-on experimentation.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) | BHS

2026–2030 (expected)

TECHNICAL SKILLS

Programming: Python, C, C++, MATLAB
Web: HTML
Developer tools: Git, GitHub

SELECTED PROJECTS

AI Job Finder | Python, Streamlit, GitHub

- Built and deployed a web application that helps users explore job opportunities using resume-based matching. Maintained the project in a GitHub repository and deployed the app with Streamlit Community Cloud.

MobileBluetoothBridge | Android project

- Developed an Android prototype focused on Bluetooth communication between a mobile device and an external client.

Arduino UNO R4 WiFi | IoT experiment

- Worked with the Arduino UNO R4 WiFi board in a college experiment, exploring device connectivity and basic hardware interaction.

Personal Portfolio | HTML, CSS, JavaScript

- Building an interactive portfolio to document projects, technical skills and development progress.

TECHNICAL PARTICIPATION

Participated in an SVF hackathon. (Event date and official event title can be added after verification.)

LEARNING & INTERESTS

Software development • Cybersecurity • Artificial intelligence and machine learning • Internet of Things • Developer communities
